

## Dams 4 and 9 Update

The Engineering assessment for Rock Mill Dam No. 9 off Mt Zion Rd. and Dam No. 4 on HRCD owned property on Stonewall Cemetery Rd. The U.S. Department of Agriculture-Natural Resources Conservation Service (NRCS) has dedicated the engineering resources to complete this assessment to meet current design standards and provide for the next fifty years of operation. Work was moving forward, and project alternatives were developed and finalized; however, additional delays have occurred due to the Government shutdown from October 1st to November 12<sup>th</sup>. In addition, restructuring within the program has resulted in personnel changes and funding uncertainties. Currently there is no clear path forward. Updates will be posted here when available.

In addition, Hunter's Run structures 1, 2, and 3 were scheduled to begin their rehabilitation assessment beginning in the summer of 2022. This has been delayed indefinitely due to the reasons stated above.
